*Adds lasting comfort & beauty outdoors*

#### **What is Evergrain composite decking material?**

Made from a composition of recycled wood materials and polymer resins, Evergrain is a revolutionary, easy to maintain alternative to wood decking that never needs oil treatment to keep it looking beautiful, along with toughness and other benefits that wood cannot offer.

#### **Why choose Evergrain?**

Evergrain has the most authentic look of wood. Its wood grain effect is achieved by using an exclusive compression moulding technique.

#### **Why use Evergrain composite decking?**

- No oil treatment ever needed, so you can really relax! Wood can look unsightly when the stain wears out.
- It has high slip resistance making it safe especially for hot tubs. Wood gets dangerously slippery when wet.
- It won't split, splinter or rot, safe for bare feet, safe for installers. Wood rot, cracks or splinters can be very off-putting.

#### **Authentic colours**

Classic: Redwood, Cedar, Weathered Wood, Cape Cod Grey  
Vibrance: Golden Oak, Cherry, Thunderstorm Grey, Birchwood

#### **What Evergrain deck owners say**

"It absolutely enhances our garden, in fact the whole property, but best of all we now have a clean and beautiful outdoor space to relax and enjoy."

"It is great value for money because we can enjoy it without having to do much maintenance & no extra annual expenditure on things like treatment oil!"

#### **What installers say**

"Great product. We would recommend it to clients."
