

Polytops[®] Colour PRO

The guaranteed colourfast solution

Polytops[®] COLOUR-PRO is the new range of fasteners with a 10 Year Colourfast Guarantee.

The new range consists of 8 guaranteed colours (including white) which have been developed for fixing wood grain and foiled PVC-u profiles which also carry a 10 year guarantee – now you can specify fixings that will perform to the same standard giving a completely colourfast installation – guaranteed for 10 years.

Polytops[®] COLOUR-PRO pins, nails and screws can be used with confidence and peace of mind on fascias, soffits and trims for a professional, quality installation on all manufacturers PVC-U boards.

Manufactured using a highly stable tough engineering thermoplastic, Polytops[®] COLOUR-PRO products offer a completely colourfast solution with a unique balance of properties:-

- Strength & toughness
- Overall exterior durability
- Resistant to weathering and ultraviolet
- Colour retention with stain and chalk resistance
- Resistant to chemicals, fungi
- High thermal stability
- Increased impact at ambient and colder temperatures
- Flexibility – less brittle
- Greater corrosion resistance on building panels

The Polytops[®] COLOUR-PRO range has been specifically developed for fixing of all board manufacturers PVC-U roofline products and has been fully independently tested for weathering and colour fastness by Bodycote Materials Testing Ltd.

Data

Type	Materials	Gauge	Length
Pins	A4 Stainless steel	14	20mm, 25mm, 30mm, 40mm
Nails	A4 Stainless steel	10	40mm, 50mm, 65mm
Self tapping Cladding screws	A4 Stainless steel	8	30mm, 40mm, 50mm, 65mm

Testing Data

Tested under British Standard Methods of testing for Plastics BS2782: Part 5 Method 540B Annex D all Polytops® COLOUR-PRO products have been tested for colourfastness and resistance to weathering by exposure to laboratory light sources.

The test conditions used QUV-A lamps to simulate northern European light for 2000 hours exposure to represent 10 years ageing. During exposure, the test pieces are subjected to four hours with a relative humidity of 95% ± 5% at 50°C followed by four hours with QUV-A 340nm lamps at 60°C.

Polytops® COLOUR-PRO fasteners showed excellent results with negligible colour change in line with manufacturers PVC-u board. Ratings did not give less than 4-5 on the grey scale, which is above that specified in BS7619 as the maximum colour change for extruded cellular unplasticised PVC (PVC-UE) profiles.

The 10 Year Colourfast Guarantee

- Polytops® COLOUR-PRO carry a 10 year guarantee for colourfastness and weathering which is offered in accordance with BS2782: Part 5 Method 540B.
- The installation shall be restricted to the area of Mid to Northern Europe (latitude 45° to 60°).
- The 10 Year Guarantee applies to Polytops® COLOUR-PRO products only.
- Notice of claims shall be given in writing to SEAC within the 10 year period from date of despatch.
- The claimant should allow access to the installation for inspection.
- Polytops® COLOUR-PRO fasteners installed for less than 10 years which do not remain colourfast to the standard required by BS2782: Part 5 Method 540B will be replaced free of charge and profile damaged as a direct result will be made good or replacement funded.
- The guarantee does not apply to normal wear and tear.
- Any materials which have been the subject of accidental damage, damage by misuse or damage through installation are not covered by this guarantee.
